

# Texas A&M Hypertension BRP

## Principal Investigators

- A&M Dwight Look College of Engineering
  - J.D. Humphrey, K.R. Rajagopal
- A&M College of Veterinary Medicine
  - T.F. Fossum, M.W. Miller, J. Stallone
- A&M HSC College of Medicine
  - L. Kuo, E. Wilson, G. Davis
- Washington University - L.A. Taber

# Texas A&M BRP - Objectives

- Primary Objective
  - To quantify spatial and temporal gradients in vascular growth and remodeling during coarctation induced hypertension in resistance and large arteries from both the cerebral and the coronary vasculatures in the same model.
- Secondary Objective
  - To construct a general theoretical framework for describing vascular growth & remodeling.
